

ACTIONS TAKEN

Furniture

Positive-1

“I really like the booths on the second floor.” Freshman Biology/Chemistry/Mathematics

Negative-4

“More reading chairs”-Junior MBA

“There needs to be more tables available.” Junior- Nursing/Community Health

“My one grievance is that chairs are too high and the desks are too low at the normal four-person study tables. I can’t even cross my legs comfortably!” –Senior-Biology/Chemistry/Mathematics

Response:

All of these comments are absolutely correct! We want more seating. We also want more varieties of types of seating. We found that the tables with which the Library was originally furnished have a “skirt” that prevents people from crossing their legs. Any new furniture we bought does not have this. We investigated a method for raising the height or removing the skirting and bracing the table legs in a different way. We will solve this problem.
